Caleb Josue Ruiz Torres

Senior Software Developer	**|Lead Software Developer**
calebjosue-dev@outlook.com	**| 742 115 2129**

AREAS OF EXPERTISE.

Java	Microservices	AWS	Azure	C#	Jenkins	DevOps	PHP
Docker	Kubernetes	REST	Python	Git	SCRUM	Maven	GX
HTML	JavaScript	CI/CD	SQL	Swift	Agile	CSS	Scala

- Backed by **10+** years of experience in the Software Industry.
- Languages: Spanish and English.
- Companies I have collaborated with:

EXPERIENCE.

Kenzan, An Amdocs Company   2019 – 2022
Backend Software Developer II.
- Collaborating with my team to write Microservices in the Java programming language.
- Helping with writing unit testing with Jacoco integration, migrating existing unit tests, originally those tests were written using Power Mockito, and now they are using Mockito.
- Helping in the migration from Apache Cassandra to AWS Keyspaces for Apache Cassandra. Basically, I was writing some CQL (Yes, this is a dialect, not to confuse with SQL) queries.
- Since Maven was reporting some warnings, I helped to decrease the number of them by reducing dependency usage in the projects.

Tata Consultancy Services   2017 – 2019
Lead Java Developer
- REST Web Services Development in Java using JAX-RS, with React Front-End Integration (Which was only for a week, then I was moved to Wicket which made me move to another team).

- Leading a three people team. They were sending reports in the afternoons about their business day activities, and I was forwarding those reports to the person in charge of the office.
- On board new personnel brought to the company (University graduates). I gave a refresher to Java to them and designed some SQL exercises for them to solve and learn on the road.
- Completing tech-related training requirements this company invited us to take.
- I was awarded Star Team recognition.

Flex   2016 – 2017
.NET, SQL Developer
- REST Web Services Development with .NET MVC 5.
- Front-End Development with HTML5, Razor, CSS, SASS.
- We also happen to use Grunt, and Gulp.
- SQL Server Studio was our RDBMS.

Hewlett-Packard   2015 – 2016
.NET Developer
- App Owner of two desktops applications related to Brazil Tax System.
- The applications were written using .NET, and I was basically solving tickets.
- Eventually I'd get to design some query to measure this application's performance.

Secretaría de Educación Guerrero   2010 – 2013
IT Analyst
- Software Development internal to this State institution.
- We were using GeneXus for this purpose.
- I used PHP to deliver one of the aforementioned tools. The application was intended to assist in the inventory of the IT department.
- SQL Server Studio was our RDBMS, and then I used MySQL for the just mentioned system.

CoRam   2008 – 2008
Java Jr. Developer.
- Mostly designing user interfaces with Matisse within NetBeans.
- Jasper Reports Integration.
- We were using MySQL as our RDBMS.

EDUCATION.

- Bachelor's degree in computer science.   2003 – 2009

LIFELONG LEARNING COMMITMENT.

- Effective programming in Scala.   2022 – 2022
- Unix Tools: Data, Software and Production Engineering.   2022 – 2022.
- Cloud Developer Using Microsoft Azure.   2020 – 2021.
- AWS Developer - Building on AWS.   2018 – 2018.
- iOS Developer Nanodegree.   2016 – 2017.
- Introduction to Computer Science and Programming using Python.   2016 – 2016.
- FP101x: Introduction to Functional Programming.   2015 – 2016.
- AWS Certified Cloud Practitioner (on my way to earn it [Suspended, run out of budget to pay for AWS Developer account, I know its pennies, but I can't afford it right now]).
